

OLYMPICA G3

Sonus faber

ARTISAN OF SOUND

INSPIRED BY ITALIAN CULTURAL HERITAGE

Olympica G3 draws inspiration from the Teatro Olimpico and the fundamental ideas of Renaissance architect Andrea Palladio about balance, proportion and harmony. Olympica G3 expresses a timeless aesthetic, where exclusive materials, refined craftsmanship and complete design create a natural link between form and function. The iconic and well-known form factor is preserved, but Olympica G3 is upgraded with completely new speaker drivers, an improved cabinet construction with advanced damping structures, a new Phase Coherent crossover design and technology taken directly from Suprema and Amati Supreme.

SONETTO G2

Sonus faber

ARTISAN OF SOUND

ITALIAN POETRY

Handcrafted by Sonus faber in Vicenza, the Sonetto G2 speakers share many features with the Olympica and Homage series, with the characteristic lute-shaped cabinet design, first introduced at Guarneri in 1993, contributing to a significant reduction in resonances and standing waves. Sonus faber uses exclusively natural materials for the speaker drivers. Advanced silk dome tweeters and air-dried midrange and bass cones with a blend of natural fibers and paper.

All models are available in walnut, wenge and black piano lacquer.

The Homage series from Sonus faber is a tribute to Italian culture, music and history's most renowned instrument makers. The Homage Collection is designed to convey music with a presence and nerve that is normally only experienced at a concert. Newly developed technology contributes to a more dynamic reproduction combined with an adventurous presentation of details - without losing the natural, organic expression that characterizes Sonus faber. The craftsmanship is as complete as the sound. Italian furniture craftsmanship combined with modern elegance in the iconic, lute-shaped cabinets - shaped in wood and refined to perfection.

REFERENCE

Sonus faber

ARTISAN OF SOUND

The Reference Collection is designed with an uncompromising ambition to realise the ultimate in High-End Audio. Each model is developed as a musical instrument and designed to convey the most subtle nuances of the recording and reproduce this with absolute precision. For more than forty years, Sonus faber has perfected the balance between innovation and traditional Italian craftsmanship. The Reference Collection represents the culmination of this heritage. The Reference series unites advanced acoustic research, technology and the highest quality materials in a construction where every component of the speaker is optimised and perfected. The cabinets are shaped and fine-tuned with the same precision as an exclusive instrument, where aesthetics and acoustics work in perfect symbiosis. The result is a physical presence – uncompromising, majestic and timeless!

Luxury meets minimalist elegance in natural harmony. Luxury, minimalist, and natural are the pillars that form the core of the Lumina Collection. Simple, squared designs emphasize the quality of materials used. This multi-award-winning collection captures the essence of Sonus faber sound in a minimalist and versatile design. With pristine delivery of music, dialogue, soundtracks, and sound effects, Lumina is both immersive and versatile – the perfect match for both stereo music listening and a multi-channel system for film and TV. Conceived in 2020, the Lumina collection emphasizes the value of enjoying life's special occasions and the living spaces where these moments unfold. Sound plays a key role in shaping our lives: music uplifts our moods, evokes emotions, sparks nostalgia, and fosters a sense of belonging right in our homes.

The Heritage Collection continues the classic design from the earliest Sonus faber models with exclusive materials such as solid walnut, brass and marble. The Heritage series builds on Sonus faber's well-known signature with uncompromising two-way constructions. The speakers have been upgraded with new and lavish elements combined with Sonus faber's most advanced delefilter technology. All the speakers are hand-built in Italy and with materials that are the very foundation of Sonus faber's philosophy of Natural Sound – organic and authentic sound!

GRAVIS SUBWOOFER

Sonus faber

ARTISAN OF SOUND

The first version of the Gravis subwoofers was launched in 1986. For more than 40 years, Sonus faber has designed subwoofers where the common denominator has always been complete constructions with high performance. Today's Gravis series consists of five models, all of which have a precision and flexibility that provides easy – and seamless – integration into any speaker system. All models use classic A/B amplifier technology for the best possible performance and sound quality.

All subwoofers have both Hi-Level and line inputs with individual volume control. This provides easier adaptation, refinement and control for stereo and a more voluminous foundation for home cinema and movies. Gravis III, V and VI also have app control with automatic calibration and advanced DSP/equalizer functions where all settings can be easily fine-tuned from the listening position.
